Certification Test Results

Application Details

Name: WinDou

Version: 1.0.0.0

Company Name: Hcs66

Windows Phone OS Version: 7.1

Test ID: 406629

Submission Received: 11/08/2012

Testing Completed: 11/12/2012

Application Test Details

Capabilities Tested: Networking

Language(s): SimplifiedChinese

Result: Failed

Failure Summary: 5.1.2

Exception(s) Applied: None

Action: Please address the comprehensive list of failures below, review the [Windows Phone Application Certification requirements](http://go.microsoft.com/fwlink/?LinkID=183220) (<http://go.microsoft.com/fwlink/?LinkID=183220>) and resubmit your updated application for certification testing. For further assistance, please submit a support ticket using the Support e-Form in the [Dev Center Dashboard](http://go.microsoft.com/?linkid=9762121) (<http://go.microsoft.com/?linkid=9762121>).

Windows Phones Tested: LG Optimus 7, Nokia Lumia 610, Nokia Lumia 710, Nokia Lumia 800

Technical

5.1 Application Reliability

5.1.2

Requirements

The application must handle exceptions raised by the .NET Framework and not close unexpectedly. During the certification process, the application is monitored for unexpected closure. An application that closes unexpectedly fails certification. The application must continue to run and remain responsive to user input after the exception is handled.

Tip:

Your application may close unexpectedly if it tries to access an API that it does not have the security capability to use. For more information about how to work with security capabilities, see [How to:](#)

Expected Result

1. Launch your app.
2. Navigate throughout the app, and then close the app.
3. Verify that unexpected behavior does not occur during the closing process.
4. Verify that the app remains responsive to user input and user interaction following an app error.

Determine Application Capabilities.

Recommendations

When handling exceptions, an application should provide a user-friendly error message. You may present a message that is relevant to the context of the application.

Comments: The application terminates unexpectedly in response to user input.

Result: Fail

Steps to Reproduce:

1. Launch the application.
2. Login the application with "douban" credentials.
3. Swipe right to the "广播" pane.
4. Tap the "+" button on the application bar.
5. Enter text and tap ok button.
6. Notice the application unexpectedly terminates.

Comments: When the device does not have an active data connection, the application terminates unexpectedly in response to user input.

Result: Fail

Steps to Reproduce:

1. Disable active data connections on the device.
2. Launch the application.
3. Tap the "确认" button on the application bar.
4. Observe the application unexpectedly terminates.
